

InVite™

fruit fly trap

Do not remove this film prior to or during use! Make sure the small hole in the center of the top is fully open. Using the spout, squeeze approx. 2 oz of Liquid Lure through the hole in the trap, swirl to activate. The trap can be placed right side up, hung on it's side, or hung upside down. Turn slowly when turning upside down to minimize any spills. If desired, this film can be removed after use, to assist in counting the number of flies trapped.
